# How to Use Google Chrome History on Mac

1. First, open the History Option available on your screen's Header Bar.
2. Scroll down to the bottom and **Click Show Full History**
3. You should be redirected to a different tab of your most recent searches.
4. Select which search title you wish to delete by clicking on the box icon next to it.

## To Clear Search History on Google Chrome

1. To completely clear your search history, click the Clear browsing Data option located on the left side of the tab.
2. You will be directed to a new page in **Google Chrome Settings.** The pop-up box of the **Clear browsing data** will automatically appear once you get to that page.
3. At the top left corner there, there will be a **Time range** option. You may select your time preference of browser history to delete.
4. In the **Clear browsing data** box, there will be three options from top to bottom: a) **Browsing history,** b) C**ookies and other data** c) **Cached images and files.** After reading the descriptions of each one, select your preference.
5. For the **Advanced** clearing option, located on the top right side next to **Basic** (the default option), you will be given more options: a) Browsing history b) Download history c)

Cookies and other sites d) Cached images and files e) Passwords and other sign-in data, f) Autofill form data g) Site Settings h) Hosted app data.

6. Once you have selected all your preferences, you may click the **Clear data** icon.
